

Erratalist for 4th Edition of A Primer on Scientific Programming with Python

Hans Petter Langtangen

Sep 7, 2014

Page 4. The one-line program to be written in a text editor must have `t**2` and not `t^2`.

Page 95. In the program `c2f.py`, the `print` statement has a wrong formatting of the $F(C)$ value: `%5.1f` must read `%5.1f`, i.e., the same formatting as used for the C value.

Page 99. Heading in Section 3.1.5 should be *Function argument or global variable?* (or instead of *of*).

Page 130. In Exercise 3.6, Equation (3.10), the sum must be $\sum_{i=0}^{n-1}$.

Page 447. The title of the chapter should be *Random numbers and simple games*.

Page 845-846. To successfully execute the `c2f.py` program, `cmd` must be `python c2f.y 21` or `./c2f.py 21` (if `c2f.py` is an executable file) unless `.` is in the user's `PATH` variable.

Page 846. 2. Under *Split file or folder name*, the name `user` in the text should be replaced by `/home/hpl` according to the interactive session.
